

## **One Day Training -cum -Demonstration Programme on Poplar**

**Poplar is a very prominent tree species in plantation forestry in India but due to non availability of germplasm farmers of Eastern U.P could not grow it in their land, so an efforts was made by CSFER in 2013 by collecting some promising clones cuttings of Poplar from Silviculture Division, Forest Research Institute, Dehradun.**

**Training cum demonstration programme was organized on 18.02.2014 for the local farmers at Central Research Nursery Padila. The chief Guest of the Training, Shri S.N. Shukla, ACF, UP Forest Department, Allahabad highlighted the importance of Poplar cultivation in agro forestry. Dr. Kumud Dubey, Director, CSFER, Allahabad welcomed all guests and farmers and focused on development of agroforestry with Poplar in Eastern U.P.**

**In One Day Training Programme cuttings of different clones of Poplar (originally collected from Silviculture Division, Forest Research Institute in 2013) was distributed to the farmers. Before distribution of cuttings demonstration and Lecture “How to Grow Poplar Through Cuttings” was given by Organising Secretary Dr. Anita Tomar.**

**Dr. Anubha Srivastav delivered a talk on Marketing of Poplar in Eastern U.P. Dr. V. P. Pandey also delivered a lecture on Poplar- Diseases and their control measures. Dr. S.D. Shukla interacted with farmers and answered their queries.**

**During training, farmers also visited V.M.G of Poplar in nursery and practical demonstration was also given to them.**

Scientist of CSFER with Chief Guest Shri Shukla, ACF
