

## SALE OF IFGTB PUBLICATIONS - A CROWD PULLER

The IFGTB has brought out very good publications over the years. They include books, brochures, project findings, Bulletins, etc. Some of the publications that have been in constant demand include

1. Seedling Seed Orchards
2. Genetic Improvement of Trees
3. Quality Planting Stock Improvement
4. Species Monographs
5. Money Spinning Series
6. Flowering Plants of Sholas and grasslands of Nilgiris.
7. Eco friendly approaches for rehabilitation of mine spoils
8. Country Report on the State of Forest Genetic Resources
9. FGR Management in India
10. A manual on Economically Important forestry species in South India

These publications are put up for sale during all workshops / training programmes conducted by the Institute which draw good crowds. We have been able to put up sale counters during National events like Indian Science Congress, Forestry Exhibitions organized by the State Forest Departments and also during farmer melas.

Some of the publications in vernacular have drawn special interest amidst farmers of Kerala and Tamil Nadu. Many of our leading publications are being reprinted to meet the growing demand. The Extension wing of IFGTB is involved in this activity. The efforts of the scientists to disseminate excellent findings in the form of published material have drawn kudos from the farming communities and foresters who visit the Institutes. The Institute has supplied books to Forest Departments, ICFRE Institutes and needy farmers. There have been repeated requests that some of our publications should find place in leading book sale outlets and libraries. Colleges and university libraries including retired forest officials have been requesting for our publications at subsidized rates / as complimentary copies.
