

## **Field training on Lac cultivation using Scientific Approach**

Two day training on "Lac Cultivation using Scientific Approach" was organized on 22-23rd Jan, 2013 at Kolebira Forest Range office and at Simdega Divisional Forest office campus for the farmers, SFD staffs and field functionaries. Overall 385 farmers, field functionaries and SFD staffs participated in the training. A Team of IFP, Ranchi including Shri M.K. Chanchal, Shri S.N. Vaidya and Shri R.K. Mahto participated in the above said training as technical experts. The team members delivered the lectures on various aspects of lac cultivation including introduction to lac hosts, lac insect life cycle, lac inoculation, phunki removal, identification of healthy broodlac, insect pest management and harvesting. The issues related with the processing of seedlac, button lac, shellac and their use in day to day life has also been explained to the participants.
