

### Exposure Visit of Trainee Foresters of Assam Forest Department

As a part of educational tour to expose, experience, interact and inculcate the practical method of different field works for overall orientation and upgradation in dealing with the situation as may be demanded while discharging their duties, thirty three Trainee Foresters of Assam Forest Department visited Rain Forest Research Institute, Jorhat on 13<sup>th</sup> March 2014. Dr. T. C. Bhuyan, Scientist, Forestry Extension Division welcomed the Trainees and acquainted them with various research and development activities of the Institute.

The Trainees visited RFRI nursery, bambusetum and Bamboo Composite Center. Dr. Bhuyan explained different techniques of bamboo propagation and multiplication. The Trainees witnessed the various machines used in bamboo handicrafts making at Bamboo Composite Center. They were demonstrated the functioning of these machines. The Trainees were also explained about the bamboo preservation techniques and bamboo charcoal making.
