

## **Training to Field Staff of FSI Nagpur on assessing and recording the impact of Damage caused by Insects-pests and diseases to tree spices in forests of Central India**

A three day training programme on assessing and recording the impact of Damage caused by Insects-pests and diseases to tree spices in forests of Central India was organized by Tropical Forest Research Institute

jointly with FSI, Nagpur during 28-30 July 2016 at Nagpur. This training was organized to fulfill the demand of new National Forest Inventory (NFI) design. Under new NFI parameters w. r. t. forest health have been introduced which include rotten/missing cull, incidence of insect, incidence of disease and extent of their presence on trees by assessing the decay class etc. The purpose of the training was to make aware the field staff of FSI on how to assess and record the damages caused by Insects-pests and diseases during field survey.

Dr. N. Roychaudhary, Scientist-G, Dr. R. K. Verma, Scientist-G and Dr. P.B. Meshram, Scientist-F was the resource persons, who imparted the training and attended all the queries of participants.
