**Orientation of the PG students on methods and techniques employed in the natural products chemistry – 04.11.2022**

Chemistry & Bio-prospecting Division of Forest Research Institute, Dehradun organized two orientation programmes for the PG students on methods and techniques employed in the natural products chemistry on November 02 and November 04, 2022. A group of 30 trainees under the Department of Science & Technology - STUTI program on 'High End Techniques for Analysis of Molecules, Materials and Pollutants' from Doon University, Dehradun and 15 M.Sc (Chemistry) students from D.B.S. (P.G.) College, Dehradun alongwith their faculty visited the Chemistry & Bio-prospecting Division and had a round to the laboratories and analytical instrument facilities of the Division with great curiosity and enthusiasm. They interacted with scientists and gained knowledge about various wet laboratory methods and got acquainted with state-of-the-art sophisticated modern analytical equipments and their functions.
