

Azadi Ka Amrit Mahotsav

Training cum Awareness programme on identification of Economically important medicinal plants and their use

09 November, 2022

A Team of 28 students of B.Sc first year Botany and Microbiology and three teachers from CIMTI College, Ridhora, Sausar Chhindwara District visited FRC-SD, Chhindwara on 9.11.2022 as field exposure tour. During the period, the students were given information about the plant diversity of the centre and important medicinal plants available in the nursery. Details of plant botanical and common names were delivered along with their uses. In lab visit, they were made aware about the equipment and their uses. Centre has developed one museum and students during their visit found variety of items made from bamboo viz. bamboo based jewellery, handicrafts, other daily utility items. Medicinal plants seeds of various species were also seen along with their photographs. All students were overwhelmed by the information disseminated to them and keenly learnt and showed their curiosity and interest in obtaining the information.
