PREFACE

Forests of India cover around 21.71% land of the country and are integral to the socio-economic development of the country. Forest resources therefore have to be managed and conserved efficiently for achieving the sustainability of socio-ecological systems. This requires a broader understanding about the functioning of the forests under the changing climatic conditions and anthropogenic pressures, and a long term temporal evaluation of various features of the forestry sector.

Statistical database is important for the forestry sector for devising planning and policy perspective for the growth and development of the sector. ICFRE has been collecting, collating and disseminating forestry statistics by publishing the biennial publication namely *Forestry Statistics India (FSI)*, since 1994. However, the present issue *FSI 2021*, is being published after a gap of a decade and contains the data for the period 2010-11 to 2019-20 so that the interval may be covered.

The present report *FSI 2021* contains information and data on various forestry parameters of the country on a time scale and provides an opportunity to analyze the forestry sector at the National level. The Division of Forestry Statistics (DFS) at the ICFRE Headquarters ensures collection and compilation of forestry data by sourcing from SFDs (State/UT Forest Departments) and other associated departments and ministries such as Ministry of Environment, Forest and Climate Change (MoEF&CC), New Delhi; Ministry of Statistics and Programme Implementation, New Delhi; Directorate General of Commercial Intelligence and Statistics, Kolkata; Forest Survey of India, Dehradun; Department of Land Resources, New Delhi; Indira Gandhi National Forest Academy, Dehradun; Department of Forest Education, Dehradun; National Biodiversity Agency, Chennai; Wildlife Institute of India, Dehradun and others.

The data collection from States/UTs has been channelized with assistance of Nodal Officers of the various institutes of the ICFRE, who coordinate and liaise with the SFDs through the Nodal Officers of the SFDs of the respective states. The data collection mechanism revolves around the retrieving of the data from respective Departments through the customized formats or from the statistical reports of the States/UTs. The data obtained from the SFDs has also been cleaned (desk-review) and the unusual data figures were cross checked and validated with the help from the States/UTs before inclusion in the report.

The *FSI 2021* focuses on the various important themes of the forestry sector as Forest Resources, Vulnerability and Mitigation, Establishment, Production, Wildlife, Eco-tourism, Social and Economic Aspects, Silviculture, Wood Based Industries and International Trade (Export and Import) of Wood-Based Products and these themes are organized as seven chapters. Each chapter has an introductory note for a comprehensive visualization of the theme of the chapter. The *FSI 2021* would complement the other report i.e. *Forest Sector Report India (FSRI)*, of the ICFRE published by the DFS, ICFRE to give a holistic picture of the sector.

Credit is due to all the SFDs for their support and for contribution to the report and also to the DFS, ICFRE and Nodal Officers of the all Institutes of ICFRE who have facilitated and supported for the publication. We acknowledge the MoEF&CC, GoI for providing financial support for the publication. The support received from the other departments who facilitated for the data collection and provided the information is also acknowledged.

The team of DFS has been disseminating forestry statistics for analyzing various fundamental areas of the forestry sector of the country. The DFS tries its best to cross-check the data through various means of validation. The final draft compilation has also been circulated to SFDs again in December 2021 to cross-check and confirm the accuracy of the data furnished by them, and the suggestions/ changes received have been suitably incorporated.

Improvement is a continuous process and the DFS endeavors to bring qualitative and quantitative changes in the Forestry Statistics. We are sure this compilation will be of immense use as a one source reference for the use of forestry statistics. We request the stakeholders of forestry statistics to assist us in strengthening the processes of periodical compilation of forestry databases and building a databank for the sector so that the long felt gap in the reliable forestry statistics is bridged.

ICFRE, Dehradun

EXECUTIVE SUMMARY

The *Forestry Statistics India*, a biennial compendium of the official statistics of the forestry sector of the country, is being published by the Indian Council of Forestry Research and Education (ICFRE), Dehradun since 1994. The *Forestry Statistics India 2021*, covering the Statistics for the years 2010-11 to 2019-20, contains seven chapters and is being published after a decade. The chapters are (i) Forests: Resources, Vulnerability and Mitigation (ii) Forests: Human and Financial Resources (iii) Forest Production: Timber, Non-Timber Forest Products and Bamboo (iv) Protected Areas, Wildlife and Ecotourism

Rakesh Kumar Dogra

(v) Social and Economic Aspects of Forestry (vi) Silviculture (vii) Wood Based Industries and International Trade.

India has a forest cover of 21.71% of India's geographical area and spreads across the States and UTs of the country in 7,13,789 km², as reported by Forest Survey of India (FSI), Dehradun. The density wise forest cover proportion in respect of country's geographical area of Very Dense Forest, Moderately Dense Forest, Open Forest and Scrub are 3.03%, 9.33%, 9.34% and 1.41%, respectively. India's forests are classified into 16 forest type groups, in addition to two categories of plantations/ToF. The group Tropical Dry Deciduous Forests has the maximum area (40.86%) among all the forest type groups. India's forest cover and ToF contain 4,388.15 M cum and 1,779.35 M cum of growing stock, respectively.

The forest resources have been continuously under tremendous pressure. The encroachments on forest land; unrecorded removal of timber, fuel wood and non-timber forest products (NTFPs); invasion of species, and unregulated tourism led to degradation of forests and deforestation. Forests and forest resources are also vulnerable

to various stresses, as illicit removal of wood, poaching of wildlife, forest fires, encroachments, etc. Forest lands are also being diverted for various developmental activities like road construction, mining, electric power projects etc. Various measures for conservation and development of forests through management and forestry interventions are being implemented for mitigating the challenges faced by the forests.

The area of forests by ownership of the land under the State Forest Departments (SFDs) classified into three broad categories i.e. Reserved Forests, Protected Forests and Unclassed Forests. The total area classified as Reserved Forests is 4,42,276 km², that classified as Protected Forests is 2,12,259 km² and Unclassed Forests area is 1,20,753 km², reported by Forest Survey of India, Dehradun. Twelve States/UTs of the country have Mangroves with an estimated area of 4,992.32 km². The report also contains the wasteland statistics which are potential lands for various restorative purposes.

The SFDs are organised into the territorial and functional classification for managing the forests. Territorial classification organizes the States/UTs forests into various spatial units in descending order of size viz., Circle, Divisions, Ranges, Blocks/Sections and Beats. The Divisions, Ranges, Sections and Beats are headed by Deputy Conservator of Forests, Forest Range Officers/Rangers, Foresters/Dy Foresters and Forest Guards, respectively. Government of India recruits Indian Forest Service Officers through Union Public Service Commission on annual basis depending upon the vacancies, who are trained in Indira Gandhi National Forest Academy, Dehradun. The recruitment to all other categories of forest staffs is being made by the state Governments where the training of State Forest Statistics Officer is conducted at the three Central Academies of State Forest Service (CASFoS). A total of eleven training schools (including three CASFoSs) exist in the country for the training of FROs.

The country is classified into ten bio-geographical zones based on the flora and fauna, namely, Trans-Himalayan, Himalayan, Indian Desert, Semi-Arid, Western Ghats, Deccan Peninsula, Gangetic Plains, Coasts, North-East and Islands. Various programmes are in place for conservation of forests and related aspects like wildlife and biodiversity. A special force known as the Eco-Task Force has also been made under the Territorial Army of the Indian Army to contribute in conservation as special measures.

The important tangible services being provided from the forests are timber, NTFPs (Tendu leave, Gum, Resin, Rattan/Cane and Lac), fuelwood, bamboo and fodder which contribute to socio-economic development by providing employment and income to many forest dependent communities.

Various protected areas like National Parks, Sanctuaries, Community Reserves, Conservation Reserves offer important measures for *in-situ* conservation of forests, while zoos are important for *ex-situ* conservation. National Parks are at the highest level of protection, followed by Wildlife Sanctuaries. The adoption of a *National Policy for Wildlife Conservation* in 1970 and the enactment of the *Wildlife (Protection)* Act in 1972 have led to a significant growth in the protected areas network of the country and at present 5.23% of geographic area is under terrestrial and inland water protected areas and an additional 0.27% area is under marine protected areas network.

The terrestrial and inland water network of protected areas is spread over 1,71,921 km². There are 148 zoos in India established and managed under Section 38 H(1) of the *Wildlife (Protection)* Act, 1972 and closely monitored by Central Zoo Authority. National Tiger Conservation Authority monitors the tiger conservation through SFDs and is also responsible for allocating funds to States/UTs under the Project Tiger. There are 51 Tiger Reserves in India spread over 18 States/UTs. While under the Project Elephant, the population of elephants has been estimated to be 29,964 in 2017. The Government of India has also established a network of 18 Biosphere Reserves to *in-situ* conserve all forms of life along with its support system, to serve as a referral system for monitoring and evaluating changes in natural ecosystems. Ecotourism originated in 1980 as a mechanism to channel tourism revenues into conservation and development and generate support and awareness for protection. All the protected areas, Biosphere Reserves, and UNESCO heritage sites also permit various degrees of ecotourism to meet the objective of conservation education.

Communities residing in areas adjoining forests also participate in various forest management programmes for achieving various goals of forest conservation through various participatory approaches such as Joint Forest Management (JFM). Participatory Forest Management and Eco-development mechanism. Various externally aided projects, Central and State schemes are implemented through JFM mechanism. The institutions of JFM have also been central in implementing the Green India Mission by further strengthening JFM Committees (JFMCs) by revamping them as bodies of *Gram Sabha*.

Biodiversity Management Committees (BMCs) are created for promoting conservation, sustainable and equitable use documentation of biological diversity by local bodies across the country. The *People's Biodiversity Register (PBR)* is a document which contains comprehensive information on locally available bio-resources including landscape and demography of a particular area or village are developed through the BMC's.

The Twenty Point Programme aims at plantation with a targeted approach, however, afforestation scheme as National Afforestation Programme is implemented to increase tree and forest cover. The Green India Mission is one of the eight missions outlined under the National Action Plan on Climate Change that aims at protecting, restoring and enhancing India's forest cover and responding to climate change. The Compensatory Afforestation Funds Management and Planning Authority (CAMPA) was constituted in April 2004 by Central Government. States/UTs have also established and setup CAMPA under *Compensatory Afforestation Fund Act, 2016* and *Compensatory Afforestation Rules, 2018*.

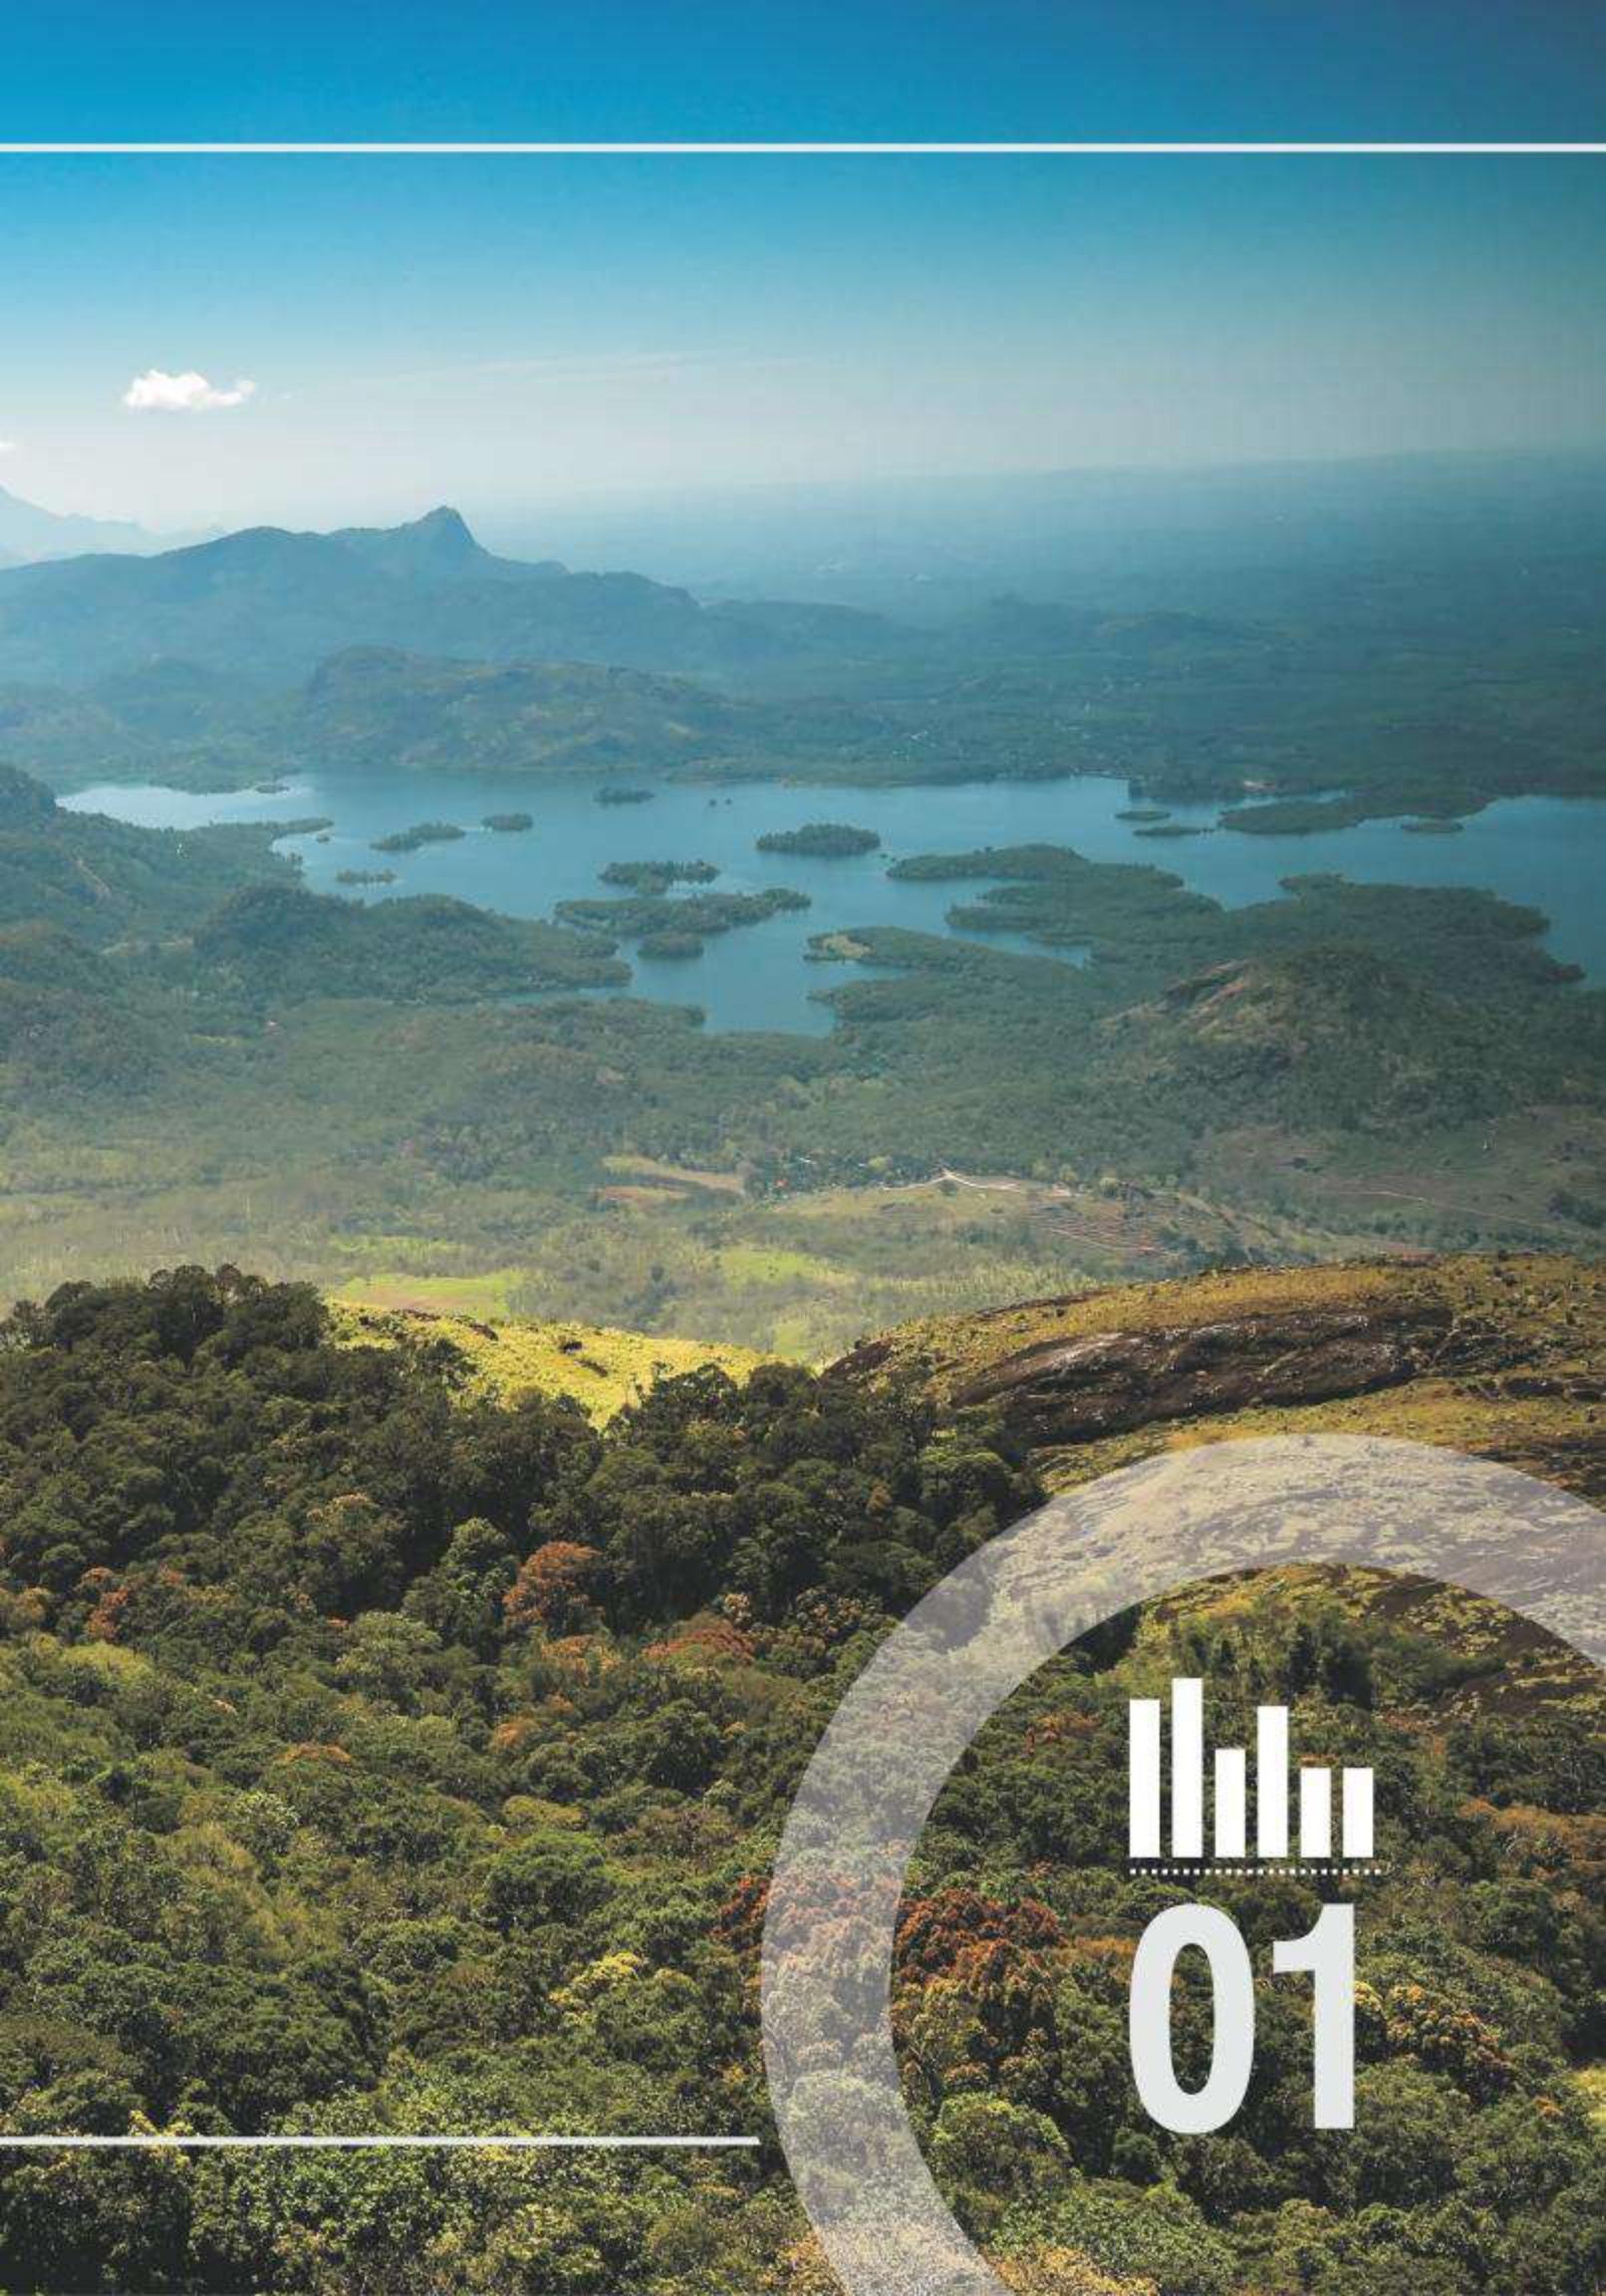

Establishment of Clonal Seed Orchards, Seedling Seed Orchards, Vegetative Multiplication Gardens (VMGs) and Nurseries are important for providing quality planting stock for the various ongoing afforestation programmes. Established with scientific input by ICFRE and its Institutes and now handed over to the SFDs, Seed Production Areas have been raised for important species like Teak, Emblica, Neem, Chirpine, Deodar, Kail, Fir, Bamboo, Acacias, Tun, Simarouba, Shisham, Eucalyptus, etc. Similarly VMGs and Seed Orchards have also been established for the important timber species and for those tree species which provide seeds and other NTFPs.

The Forestry and Logging sector is included under the Agriculture, Forestry and Fishing Section (Section A) of the National Industrial Classification (NIC-2008) at Division 02 and covers activities pertaining to the forestry sector. NIC is used to collect the data on different aspects of the economy to facilitate their use for National Economic Policy and is used in classifying the economically active population, industrial production and distribution, labour statistics, national income etc. of the country. Important wood-based industries are covered under Division 16 and 17 of NIC-2008 and categorized wood-based industries in four broad categories namely; saw milling and planing units, panel, solid wood and pulp and paper industries.

Total registered sawmills under 2m(i) and 2m(ii) of the Factory Act 1948 are 1,374 in number in the country which are very less in numbers compared with the actual number of saw mills present. *Annual Survey of Industries* reports a total of 2,353 panel industries, 952 solid wood industries and 7,180 pulp, paper and paperboard industries in the country. The Directorate General of Commercial Intelligence and Statistics is responsible for collection, compilation and dissemination of India's trade statistics and commercial information. The export and import statistics and trade related information of the importers and exporters are useful for policy formulations to the Government and other users such as researchers. Various important wood products viz. Wood in Rough, Sawn Wood, Veneers, Plywood, Particle Board and Fuel-wood are also detailed in the present report.

The report contained secondary data sourced by the SFDs and other departments. Some of the data, not reported by the States/UTs or not available with States/UTs is shown as "NA" (Not Available).

01

FORESTS: RESOURCES, VULNERABILITY AND MITIGATION

Forests contribute to the well-being of humans by supplying various ecosystem services. They provide direct consumption goods such as timber, fuel wood, fodder and value added products such as non-timber forest produces (NTFPs) including *tendu* leaves, *sal* seeds, tannins, gums, drugs, spices, insecticides, waxes, honey etc. NTFPs from forests are vital for livelihood of tribal communities and rural inhabitants living in and around the forests. Services from forests support productive purposes such as improvement and conservation of soil, thereby increasing soil fertility; protective purposes from natural calamities such as landslides, flash-floods; mitigation of climate change; adaptation to impacts of climate change and hydrological services.

The forests are spread on nearly one third of the terrestrial land (4.06 B ha) of the globe with 0.52 ha per capita forest (FAO, 2020). The total forest cover of India as of 2021 is 7,13,789 km² (21.71% of India's geographical area) with an increase of 1,540 km² forest cover over the cover in 2019. The shares of Very Dense Forest, Moderately Dense Forest, Open Forest and Scrub forest cover are 3.03%, 9.33%, 9.34% and 1.41%, respectively (ISFR 2021). The recorded forest area of the country is 7,75,288 km² (ISFR 2021). The composition of Indian forests includes tropical, subtropical and temperate and alpine forests. Mangrove forests are also found along the coastal regions of the country and have a high biodiversity and are spread across Sundarbans, Mahanadi, Krishna Godavari, Gujarat, Ratnagiri, Goa, Cauvery Deltaic and Andaman and Nicobar Islands. India's forest cover and Trees Outside Forest contains 4,273.47 M cum and 1,642.29 M cum of growing stock, respectively.

The land statistics in respect of wastelands is part of the Report as these lands are potential lands for restorative intervention. Wastelands, barren or overgrown with vegetation, are economically unproductive, ecologically unsuitable and subject to environmental deterioration; but have potential for forestry interventions. Wastelands are formed by both natural and man-made reasons such as snow-covered areas, coastal saline area, forest blank, barren hill-ridges, etc. Forests and forest resources are also vulnerable to various stresses such as illegal removal of wood, poaching of wildlife, forest fires, insect pest attacks, encroachments, etc. Forest lands are also being diverted for various developmental activities like road construction, mining, electric power projects etc. under the provisions of *Forest Conservation Act, 1980*. Various measures through management and forestry interventions are being implemented for mitigating the challenges faced by the forests.

Table 1.1. Area (km²) under forest cover

Source: India State of Forest Report (2011 to 2021)

#The figure include 295 km² of proposed Reserved Forest and 1,838 km² of deemed Reserved Forest (vested forest and ecologically fragile land)*Reserved Forest in Odisha includes 9,175 km² of the proposed Reserved Forest. Protected Forest in Odisha includes 15,117 km²revenue forest/deemed forest and 191 km² of private forest.

@The figure includes both Dadra & Nagar Haveli and Daman & Diu

FORESTS: HUMAN AND FINANCIAL RESOURCES

In India, all the forests are spatially classified into territorial units in descending order of size i.e., *Circles, Divisions, Ranges, Blocks/Sections and Beats*. A separate functional classification has also been made for catering to the specific tasks in the Forest Department. Various cadres of human resources are required for managing and conserving the forest resources of each State. At the State Forest Departments (SFDs) the following is the order of personnel: Principal Chief Conservator of Forests (PCCF) (HoFF), PCCFs, Additional PCCFs (APCCFs), Chief Conservator of Forests (CCFs), Conservator of Forests (CFs), Deputy Conservator of Forests (DCFs), Assistant Conservator of Forests (ACFs), Forest Range Officers (FROs), Deputy Rangers, Foresters, Forest Guards and Forest Watchers. Apart from these, States also have statistical officers, ministerial staffs, and other staffs for the administrative support. The Circles, Divisions, Ranges, and Beats are headed by Chief Conservator of Forests/ Conservator of Forests, Deputy Conservator of Forests, Forest Range Officers/Rangers and Forest Guards, respectively.

The human resources for the SFDs are recruited through both the Centre and State Governments. Government of India conducts yearly examinations through Union Public Service Commission (UPSC) to recruit Indian Forest Service (IFS) officers similar to the other two All India Services of IAS and IPS. The probationer IFS officers are professionally trained at Indira Gandhi National Forest Academy (IGNFA), Dehradun and they join the SFDs as per their allocated Cadre States in the country. Varied numbers of IFS officers are recruited on annual basis depending upon the vacancy. State Governments also recruit manpower for other posts of the Department. These officers are also trained to perform their duties with excellence in respective training schools. A total of eleven training schools exist in the country for the training of FROs recruited by the State. Out of the eleven, three training schools are being supervised and managed by Central Government namely Central Academy for State Forest Service (CASFOS) Coimbatore; CASFOS, Burnihat and Central Academy of Forest Education, Kurseong and the remaining training schools are being managed by the concerned State Governments.

All the training schools for the Deputy Rangers are being managed by the concerned State Governments. The State Forest Service Officers are also promoted into IFS and the training for State Government Officers is conducted at CASFOS located at the three places namely Dehradun, Coimbatore and Burnihat. The induction and mid career training of human resources of Forest Department at IGNFA Dehradun is an integral part of human resource development. Forests play a vital role in providing numerous tangible and intangible benefits, resulting into revenue generation. However, for conserving the forest resources, government also incurs expenditure on human resources, infrastructure and other resources.

FOREST PRODUCTION: TIMBER, NON-TIMBER FOREST PRODUCTS AND BAMBOO

The products and services provided by forests contribute to socio-economic development by providing employment and income for tens of millions of people (FAO and UNEP, 2020). Among the various products provided by forests, an important resource is timber, which is used for a variety of household and industrial purposes. The current pace of development leads to the exuberated demand for timber and timber products, which further increases pressure on forests. Besides this, forest area is being brought under the protected area network and restriction in green felling as well as a declined timber production from forests makes the situation more critical. The additional requirement of timber and other timber products demands are met by Trees outside Forests (ToF) and through import of timber. Besides the timber, the other important resources are Non-Timber Forest Products (NTFPs), fuelwood, bamboo and fodder.

Non-Timber Forest Products can be defined as 'forest products consisting of goods of biological origin other than wood, derived from forests, other wooded lands and trees outside forests' (FAO, 1999). NTFPs have been considered as the livelihood support for the rural communities and are a traditional source of food, fiber, medicine, etc. for the forest dwellers. Forest products are the main source of income for the forest dwelling population in the country. India is very rich in biodiversity and about 45,000 plant species are spread across the 16 agro-climatic zones. These include medicinal plants, edible plants, starches, gums and mucilages, oils & fats, resins & oleo-resins, essential oils, spices, drugs, tannins, insecticides, natural dyes, bamboos & canes, fibers & flosses, grasses, tendu leaves, animal products and edible products.

Gums are one of the most valuable NTFPs in India and exude from the stems or other parts of trees of different species. Basically they are plant exudations that result partly from natural phenomena and partly from injury to the bark or stem in response to injuries to seal the wound. It is also extracted from seeds, seaweeds, micro-organisms, etc. The most important gum is Karaya, obtained from *Sterculia urens* or *S. villosa* trees of deciduous forests. They are mainly used in textiles, cosmetics, confectionery, medicines, inks, pastes, cigar, etc. The major gum producing States are Andhra Pradesh, Chhattisgarh, Gujarat, Madhya Pradesh, Maharashtra and Uttar Pradesh. Maharashtra contributes the

maximum (30%) in gum production in the country followed by Madhya Pradesh (21%), Jharkhand (16%) and Telangana (10%). A large proportion of Indian gums are exported to the USA, the UK and France.

Resin is a secondary product which is produced by normal metabolic processes in trees. Mostly, it is collected through tapping from pine tree in the country. Arunachal Pradesh, Himachal Pradesh, Jammu and Kashmir and Uttarakhand are the major resin producing States. In India, during the last few years, the total annual production of resin has declined due to the policy to reduce the number of trees being tapped. The major portion of the demand for resin is fulfilled by import, mostly from China.

Tendu (*Diospyros melanoxylon*) leaves are one of the most important NTFP species and are largely distributed in Central India such as Madhya Pradesh, Orissa, Chhattisgarh, Jharkhand, part of Maharashtra and Andhra Pradesh. The leaves of tendu are used for wrapping bidi (Indian tobacco cigarette). It is estimated that around 3.5 lakhs tonnes of leaves worth \$200 M are collected annually from forests in India. Madhya Pradesh is the largest producing State (25%) of tendu leaves in the country followed by Chhattisgarh (20%), Odisha (15-20%), and Maharashtra (10%). Madhya Pradesh was first to nationalize tendu leaves collection in 1964 followed by Andhra Pradesh (1971) and Odisha (1973).

Rattan and cane, a climbing palm, is an important NTFP and one of the important sources of livelihood for the poor rural community, particularly in the hilly regions like the North-East. It is mainly used in furniture-making, sports goods, handicraft, mat making, wicker work, for stuffing and packing, etc. besides for various domestic uses by local tribals, apart from the conventional uses, such as medicinal uses.

India is one of the leading producers of lac across the world. About 90% of Indian lac is collected from the states of Bihar, Jharkhand, West Bengal, Madhya Pradesh, Chhattisgarh, Eastern Maharashtra and Northern Odisha. Jharkhand is the highest producer of lac followed by Chhattisgarh, Madhya Pradesh, Maharashtra and Odisha. The total production of lac was 14,222 t in 2017-18 (FSRI, 2019) and more than 75% of its production is exported to hundreds of the countries. Mostly it is used in plastics, electrical goods, adhesives, leather, wood finishing, lacquer work, printing, polish and varnish, ink and a number of other industries. The lac also yields an edible dye, which is used in colouring soft drinks and foods.

PROTECTED AREAS, WILDLIFE AND ECOTOURISM

Protected areas are the foundation for biodiversity conservation and address it over a geographical domain, along with other effective area-based conservation measures. The International Union for Conservation of Nature (IUCN) defines a protected area as 'a clearly defined geographical space, recognised, dedicated and managed, through legal or other effective means, to achieve the long-term conservation of nature with associated ecosystem services and cultural values'. IUCN Protected Areas Categories System identifies six distinct categories of protected areas according to their management objectives. These are (Ia) Strict Nature Reserve (Ib) Wilderness Areas (II) National Parks (III) Natural monuments or features (IV) Habitat/Species Management Areas (V) Protected Landscape/Seascape and (VI) Protected Areas with sustainable use of natural resources.

Aichi Biodiversity Target 11 calls for the conservation of 'at least 17% of terrestrial and inland water areas and 10% of coastal and marine areas, especially areas of particular importance for biodiversity and ecosystem services, through effectively and equitably managed, ecologically representative and well-connected systems of protected areas and other effective area-based conservation measures, and integrated into the wider landscape and seascape'. So far 16.64% of terrestrial and inland water and 7.74% of the marine area has been brought under the network of protected areas at the global level as per *World Database on Protected Areas (WDPA) 2021*.

In India, the forests and wildlife are managed under the policy framework of MoEF&CC, GoI, and by SFDs under respective States. The major causes and threats to wildlife species and habitats were habitat changes, use of pesticides, commercial exploitation, introduction of exotic species, poaching, biotic interference, use of crop protection measures and lack of organisation and guidelines for management. The specific recommendation of policy for conservation of wildlife was establishment of a central organisation to maintain territorial integrity of wildlife areas and suggested that 4% of total land area be managed as National Parks. Following the 1970 policy, several major initiatives were implemented during the 70s and early 80s. One of the initiatives was the enactment of the *Wildlife (Protection) Act in 1972*. The Act categorizes the protected areas as: National Parks, Sanctuaries, Community Reserves, Conservation Reserves, Tiger Reserves and Closed Areas as per the levels of protection afforded and the degrees of restriction on human activities.

National Parks are at the highest level of protection, with no grazing and no private land holding or rights permitted to continue. Sanctuaries are at a lower level of protection, and certain activities may be permitted within for better protection of wildlife or for any other good and sufficient reason. The adoption of a *National Policy for Wildlife Conservation* in 1970 and the enactment of the *Wildlife (Protection) Act in 1972* lead to a significant growth in the protected areas network.

There is a network of 1,110 protected areas across India, of which 981 are terrestrial and inland water protected areas. Wildlife Sanctuaries comprise 57.69% of the total terrestrial and inland water-protected areas. The terrestrial and inland water network of protected areas is spread over 1,71,921 km², approximately 5.23% of the total geographical area. In the last ten years (2010-20), the protected area in India has increased by an additional 16,391.23 km². In 2020, there were 104 National Parks, 566 Wildlife Sanctuaries, 214 Community Reserves, and 97 Conservation Reserves, spread over 1,71,921 km² representing the terrestrial and inland network of protected areas and 129 marine protected areas spread over 8,717 km². Madhya Pradesh had the highest number of National Parks, while Andaman and Nicobar Islands have the highest number of Sanctuaries. Jammu and Kashmir (undivided) had the largest percentage of geographical area under National Parks (13.23% of the total area under national parks), while Gujarat had the highest proportion of geographical area under sanctuaries (13.57% of the total area under Sanctuaries).

National parks and Sanctuaries are important for *in-situ* conservation, while the zoos are equally important for *ex-situ* conservation. As on March 2021, there were 148 zoos in India under the Section 38 H(1) of the *Wildlife (Protection) Act, 1972*. The classification of these zoos comprises large category (17), medium category (24), small category (33), mini category (60) and rescue centers (14). Conservation Reserves and Community Reserves are not found in all the States. The numbers of Community Reserves have increased from 5 to 214 in the last ten years (2010-2020). The geographical area protected as a Community Reserve was 1,301.51 km² in 2020, 1,281 km² more than the area under Community Reserve in 2010. The area under Wildlife Sanctuaries has been additionally increased by another 8,577.13 km² over the last decade.

Under the *Wildlife (Protection) Act, 1972*, initiatives were taken to conserve keystone species in the project mode. *Project Tiger* was launched in the year 1973 following the recommendations of the Special Task Force of the Indian Board of Wildlife to maintain a viable population of tigers in India for scientific, economic, aesthetic, cultural, and ecological values and to preserve the habitat of the tiger. National Tiger Conservation Authority (NTCA) closely monitors the tiger population through SFDs and is also responsible for allocating funds to States under the *Project Tiger*. There are 51 Tiger Reserves in India spread over 18 States as on February 2021. With 3,296.31 km² area, Nagarjunsagar Srisailam National Park of Andhra Pradesh is the largest Tiger Reserve in India with the largest core/critical tiger habitat. As of 2018, there were 2,967 tigers in the forests of India.

Project Elephant was launched in 1992 to protect the elephants, their habitats, and corridors, to address man-animal conflict and the welfare of captive elephants. The Project provides financial support to States with elephant populations for management intervention to protect the species and the habitat. As of 2017, the population of elephants was 29,964 spread in 23 States of India. Funds for Integrated Development of Wildlife and Habitat (IDWH) are allocated along with the union budget of Ministry of Environment, Forest and Climate change. Project Tiger and Project Elephant are funded from the budget allotted under IDWH.

The Government of India has also established a network of 18 Biosphere Reserves to conserve all forms of life *in-situ*, along with its support system, in its totality, to serve as a referral system for monitoring and evaluating changes in natural ecosystems. The Biosphere Reserves aim to promote sustainable development with people's participation and scientific management. Nilgiri Biosphere Reserve was the first Biosphere Reserve in India, notified in 1986. Based on the UNESCO Man and Biosphere (MAB) Programme, 12 of the 18 Biosphere Reserves in India are part of the World Network of Biosphere Reserves. As of 2020, there are 714 sites across globe under the World Network of Biosphere Reserves.

UNESCO adopted the international treaty '*Convention for the Protection of the World Cultural and Natural Heritage*' in 1972. The treaty aims at promoting the identification, protection, and preservation of the cultural and natural heritage of exceptional value to humanity. The world heritage sites are further classified as Natural, Cultural, and Mixed heritage sites. The UNESCO World Heritage convention identifies 38 World Heritage Sites in India with cultural and natural importance. Seven of World Heritage Sites of the country, viz., the Western Ghats, Sundarbans National Park, Great Himalayan National Park Conservation Area, Kaziranga National Park, Manas Wildlife Sanctuary, Nanda Devi, and Valley of Flowers National park, are identified as natural heritage sites and one site viz. Kangchendzonga National Park is recognized as both a cultural and natural heritage site. Kaziranga National Park is the first Natural Heritage Site recognized by UNESCO in India.

Ecotourism originated in 1980 as a mechanism to channel tourism revenues into conservation and development (Stronza *et al.*, 2019) and generate support and awareness for protection. All the protected areas, Biosphere Reserves, and UNESCO heritage sites are potential ecotourism sites. With the increase in the inflow of national and international tourists, the protected areas, apart from generating revenue, also provide livelihood opportunities for the people living around the forests while promoting conservation. Several sites are developed and promoted for ecotourism by the states.

Table 4.1. Number and area under Protected Area Network in India (as on December 2020)

| S.No. | Component of Protected Area Network | Number | Area (km ²) | Coverage % of the country area |
|--|-------------------------------------|--------------|-------------------------|--------------------------------|
| Terrestrial and inland water protected areas | | | | |
| 1. | National Parks | 104 | 43,716 | 1.33 |
| 2. | Wildlife Sanctuaries | 566 | 1,22,420 | 3.72 |
| 3. | Conservation Reserves | 97 | 4,483 | 0.14 |
| 4. | Community Reserves | 214 | 1,302 | 0.04 |
| | Sub total | 981 | 1,71,921 | 5.23 |
| Marine protected areas | | | | |
| 5. | Marine Protected Areas | 129 | 8,717 | 0.27 |
| | Grand total | 1,110 | 1,80,638 | 5.50 |

Table 4.16. Details of Biosphere Reserves (as on March 2019)

| S. No. | Name | Area (km ²) | Date of notification | Location/state/bio-geographic zones | Key fauna | Key flora |
|--------|-----------------|-------------------------|---------------------------|--|--|---|
| 1. | *Nilgiri | 5,520.00 | 01.08.1986/ 10.11.2000 | Part of Wynad, Nagarhole, Bandipur and Mudumalai, Nilambur, Silent Valley and Siruvani hills (Tamil Nadu, Kerala and Karnataka)- Western Ghats | <i>Nilgiritragus hylocrius</i> (Nilgiri Tahr), <i>Macaca silenus</i> (Lion-tailed Macaque), <i>Trachypithecusj ohnii</i> (Nilgiri Langur) | <i>Vanda sp.</i> , <i>Liparis sp.</i> , <i>Bulbophyllum medusae</i> (Medusa's head orchid), <i>Spiranthes sp.</i> , <i>Thrixspermum saruwatari</i> . (Chi-tou wind orchid) |
| 2. | *Nanda Devi | 5,860.69 | 18.01.1988/ 29.10.2004 | Part of Chamoli, Pithoragarh and Almora districts Uttarakhand- west Himalayas | <i>Hemitragus jemlahicus</i> (Himalayan Tahr), <i>Pucrasia macrolopha</i> (Koklas pheasant), <i>Ursus arctos</i> (Brown Bear) | <i>Potentilla anserina</i> (Silverweed), <i>Primula malacoides</i> (Fairy Primrose), <i>Orchis muscular</i> (Salep orchid) |
| 3. | *Nokrek | 820.00 | 01.09.1988/ 26.05.2009 | Part of Garo Hills district-east Himalayas, Meghalaya | <i>Macaca nemestrina</i> (Pigtailed Macaque), | <i>Pandanus sp.</i> (Screw pine), <i>Nypa fruticans</i> (Nipa palm), <i>Mesua ferrea</i> (Ceylon ironwood) |
| 4. | Manas | 2,837.00 | 14.03.1989 | Part of Kokrajhar, Bongaigaon, Barpeta, Nalbari, Kamrup and Darang districts of Assam,- east Himalayas | <i>Porcula salvania</i> (Pygmy hog), <i>Caprolagus hispidus</i> (Hispid hare), <i>Trachypithecus geei</i> (Golden langur) | <i>Acacia catechu</i> (Catechu tree), <i>Dalbergia sissoo</i> (Sissoo), <i>Albizia procera</i> (white siris) |
| 5. | *Sunder-bans | 9,630.00 | 29.03.1989/ 10.11.2001 | Part of Delta of Ganges and Brahmaputra river system of West Bengal- Gangentic Delta | <i>Panthera tigris-tigris</i> (Bengal tiger), <i>Varanus salvator</i> (Salvatorlizard), <i>Varanus bengalensis</i> (Bengal monitor lizard) | <i>Heritiera fomes</i> (Sundari), <i>Nypa fruticans</i> (Nipa), <i>Xylocarpus mekongensis</i> (Passur), <i>Ceriops tagal</i> (Tagal mangrove), <i>Soneratia caseolaris</i> (Crabapple)mangrove) |
| 6. | *Gulf of Mannar | 10,500.00 | 18.02.1989/ 10.11.2001 | Indian part of Gulf of Mannar between India and Sri Lanka (Tamil Nadu) – Coasts | <i>Dugong dugong</i> (Sea Cow), <i>Alcyonacea sp.</i> (Sea fan) | <i>Ipomoea violacea</i> (Morning glory), <i>Halophila ovalis</i> (Halophila grass) |

| S. no. | Name | Area (km ²) | Date of notification | Location/state/bio-geographic zones | Key fauna | Key flora |
|--------|--------------------|-------------------------|------------------------|---|--|---|
| 7. | *Great Nicobar | 885.00 | 06.01.1989/ 30.05.2013 | Southern most islands of Andaman and Nicobar | <i>Spilornis cheela</i> (Serpent eagle), <i>Macaca fascicularis</i> (Crab-eating Macaque), <i>Crocodylus porosus</i> (Saltwater crocodile) | <i>Pandanus sp.</i> (Screw pine), <i>Nypa fruticans</i> (Nipa palm), <i>Mesua ferrea</i> (Ceylon iron wood) |
| 8. | *Simili-pal | 4,374.00 | 21.06.1994/ 26.05.2009 | Part of Mayurbhanj district (Odisha)- Deccan peninsula | <i>Microhierax caerulescens</i> (Red breasted Falconet), <i>Herpestes smithii</i> (Ruddy mongoose) | <i>Coix lacryma-jobi</i> (Coix grass), <i>Shorea robusta</i> (Saltree), <i>Terminalia chebula</i> (Myrobalan), <i>Dalbergia sissoo</i> (Sisso), <i>Magnolia champaca</i> (Champak) |
| 9. | Dibru-Saikhowa | 765.00 | 28.07.1997 | Part of Dibrugarh and Tinsukhia districts-east Himalayas of Assam | <i>Trachypithecus geei</i> (Golden langur), <i>Hoolock hoolock</i> (Hoolock gibbon) | <i>Rauvolfia serpentina</i> (Rauvolfia), <i>Livistona jenkinsiana</i> (Livistona) <i>Orchid sp.</i> |
| 10. | Dehang-Debang | 5,111.50 | 02.09.1998 | Part of Siang and Debang valley in Arunachal Pradesh- east Himalayas | <i>Ailurus fulgens</i> (Red Panda), <i>Trimeresurus sp.</i> (Green pit viper), <i>Budorcas taxicolor</i> (Takin) | <i>Cyathea sp.</i> (Tree fern), <i>Begonia sp.</i> (Begonias) |
| 11. | *Pachmarhi | 4,926.00 | 03.03.1999/ 26.05.2009 | Part of Betul, Hoshangabad and Chhindwara districts of Madhya Pradesh- Semi-Arid-Gujarat- Rajputana | <i>Rucervus duvaucelii</i> (Barasingha), <i>Bos gaurus</i> (Wild buffalo), <i>Gallus gallus</i> (Red jungle fowl) | <i>Shorea robusta</i> (Sal), <i>Selaginella sp.</i> fern, <i>Bambusa polymorpha</i> (Polymorph bamboo) |
| 12. | *Khang-chend-zonga | 2,619.92 | 07.02.2000/ 25.07.2018 | Part of north and west Sikkim | <i>Panthera uncia</i> (Snow leopard), <i>Ailurus fulgens</i> (Red panda) | <i>Schima wallichii</i> (Chilauni), <i>Tsuga dumosa</i> (Hemlock) <i>Juniperous indica</i> (black Juniper), <i>Rhododendron arboreum</i> (Laal burans), <i>Rhododendron barbatum</i> , and <i>Rhododendron niveum</i> (Dwarf rhododendron) |

| S. no. | Name | Area (km ²) | Date of notification | Location/state/bio-geographic zones | Key fauna | Key flora |
|--------|------------------------|--|---------------------------|--|---|--|
| 13. | *Agasthyamala | 3,500.36 1,828.00 (Kerala) 1,672.36 (Tamil Nadu) | 12.11.2001/ 19.03.2016 | Part of Thirunelveli and Kanyakumari districts of Tamil Nadu and Thiruvananthapuram, Kollam and Pathanamthitta of Kerala | <i>Macaca Silenus</i> (Lion tailed macaque), <i>Loris tardigradus</i> (Slender Loris), <i>Buceros bicornis</i> (Great pied hornbill) | <i>Elaeocarpus ganitrus</i> (Rudraksha), <i>Diospyros malabarica</i> (Gaub tree), <i>Grewia tiliifolia</i> (Wild dhaman), <i>Syzygium cumini</i> (black plums) |
| 14. | *Achan-kmar-Amarkantak | 3,835.51 | 30.03.2005/ 11.07.2012 | Part of Anuppur and Dindori district of Madhya Pradesh, part of Bilaspur districts (Chhattisgarh) | <i>Tetracerus quadricornis</i> (Four-horn antelope), <i>Grus antigone</i> (Saras crane), <i>Philautus sanctisilvaticus</i> (Sacred-grovebush frog), <i>Gyps africanus</i> (White backed vulture), <i>Cuon alpinus</i> (Indian wild dog) | Almost 1,500 plant species representing over 151 plant families can be found in the reserve |
| 15. | Kachchh | 12,454.00 | 29.01.2008 | Parts of Kachchh, Rajkot, Surendranagar and Patan civil district (Gujarat) | <i>Equus hemionuskhur</i> (Indian wild ass) | <i>Prosopis juliflora</i> (Vilayati kikar), <i>Salvad oraoleoides</i> (Bad peelu), <i>Opuntia dillenii</i> (Cactus) |
| 16. | Cold Desert | 7,770.00 | 28.08.09 | Pin Valley National Park and surroundings; Chandratal and Sarchu and Kibber Wildlife Sanctuary (Himachal Pradesh) | <i>Panthera uncia</i> (Snow leopard) | <i>Cedrus deodara</i> (Himalayan cedar) |
| 17. | Seshachalam | 4,756.00 | 20.09.2010 | Seshachalam hill range in Eastern Ghats encompassing part of Chittoor and Kadapa districts (Andhra Pradesh) | <i>Loris tardigradus</i> (Slender loris) | <i>Pterocarpus santalinus</i> (Red sanders) |
| 18. | *Panna | 2,998.98 | 25.08.2011 | Part of Panna and Chhattarpur district (Madhya Pradesh) | <i>Panthera tigris</i> (Tiger), <i>Axis axis</i> (Chital), <i>Gazella bennettii</i> (Chinkara), <i>Rusa unicolor</i> (Sambhar) and <i>Melursus ursinus</i> (Sloth bear) | <i>Tectona grandis</i> (Teak) and <i>Anogeissus pendula</i> (Kardhai) |

SOCIAL AND ECONOMIC ASPECTS OF FORESTRY SECTOR

Forests contribute to the social and economic aspects of communities by delivering ecosystem services. The communities residing in adjoining areas are also actively participating in various forest management programmes for achieving various goals of forest conservation through various participatory approaches such as Joint Forest Management (JFM) and Participatory Forest Management (PFM). JFM is being implemented across the States with the common philosophy that consists of partnership of local communities with forest departments for sustainable forest management. JFM, is a part of the *National Forest Policy 1988* which envisages people's involvement for forest protection and conservation through democratic governance and implementation of the schemes designed for the purpose.

Various externally aided projects, Central and State schemes; National Afforestation Programme (NAP), etc. are implemented through JFM mechanism. The institutions of JFM have also been involved in implementing the Green India Mission (GIM) by further strengthening JFM Committees (JFMCs) by revamping them as bodies of *Gram Sabha*. JFMCs are village level committees and are registered societies. There are a number of Village Forest Committees (VFCs), *Van Panchayats*, and other similar groups that work in tandem with the forest personnel in sustainably managing the forests.

In India, some villages are allowed to be located inside the Reserved Forests (RFs). These villages are termed as *Forest Villages*. They are different from forest fringe villages that are located within a specified distance (about 2km) from the forest boundaries.

As per the *Biological Diversity Act 2002*, Biodiversity Management Committees (BMCs) have been created at grassroots level for promoting conservation, sustainable use and documentation of biological diversity by local bodies across the country. The People's Biodiversity Register (PBR) is a document which contains comprehensive information on locally available bio-resources including landscape and demography of a particular area or village.

Compensatory afforestation is the process of afforestation to compensate for the forest land that has been diverted for non-forestry activities. With the priorities of the Government as contained in the National Common Minimum Programme, the Twenty-Point Programme (TPP) was restructured in 2006 (*Twenty Point Programme 2006*) in conformity. The physical targets of tree plantation under TPP are fixed by the MoEFCC and intimated to the State/UT and the

progress is monitored.

Under the afforestation schemes, the NAP was launched in 2002 with the overall objective to increase tree and forest cover. NAP also aims to support and accelerate the on-going process of forest conservation, protection, management and development functions to the JFMCs. The Green India Mission (GIM) is one of the eight missions outlined under the National Action Plan on Climate Change. It aims at protecting, restoring and enhancing India's forest cover and responding to climate change. GIM activities were started in the financial year 2015-16.

The CAMPA (Compensatory Afforestation Funds Management and Planning Authority) was constituted in April 2004 as a result of the order (IA No. 566 in WP (Civil) No. 202/1995 in *T.N. Godavarman versus Union of India, 2002*) of the Supreme Court of India (https://main.sci.gov.in/pdf/cir/2015-10-17_1445060165.pdf). States have setup CAMPA under *Compensatory Afforestation Fund Act, 2016* and *Compensatory Afforestation Rules 2018*. The funds are released to their States based on the proposals and Annual Plans of Operations.

SILVICULTURE

Silviculture deals with the theory and practice of growing tree crops, and therefore is an important branch of forestry science to achieve the goal of the *National Forest Policy* that is to attain one-third of land area of the country under forest and tree cover. Maintenance of Seed Production Areas (SPAs), Seed Orchards, Nurseries is essential for the success of any afforestation program. A large number of SPAs, seed orchards (clonal as well as seedling), model nurseries, Vegetative Multiplication Gardens (VMGs) are being developed by the SFDs for various purposes such as production of quality planting stock for the afforestation and reforestation programmes.

SPA is 'a plus stand that is generally upgraded and opened by removal of undesirable trees and then cultured for early and abundant seed production'. The purpose of an SPA is to provide quality seeds of known origin from the best available phenotypes. Various specified management practices such as the removal of cut material, weeding, control of coppice growth, fertilization, stand demarcation, protection and record keeping are required for the maintenance of SPA to obtain the maximum amount of good quality seeds.

A plantation of selected clones or progenies isolated or managed to avoid or reduce pollination from outside sources and managed to produce seeds at frequent basis and in abundant quantity for easily harvested crops is Seed Orchards (*Feilberg and Soegaard 1975*). Since, a seed orchard is considered as the most common type of planted population and therefore the relevant tree improvement programs establish seed orchards to produce genetically improved seeds for practical purposes. Under the seed orchards, the seedling seed orchards (SSOs) and the clonal seed orchards (CSOs) are the most common methods of producing genetically improved seeds for forestry programs.

Typically, an SSO is established with 20 to 30 families from the best selection available and the number of offspring per family is determined by the number of trees required to meet the total seed demand for afforestation. A CSO is established with 20 to 60 clones from the best selection available and the number of trees required to meet the total seed demand for an afforestation programme determines the number of ramets per clone. Usually around 20 to 50 offspring per family and 50 to 100 ramets per clone are planted in a typical SSO and CSO, respectively.

The objective of a VMG is to provide juvenile stem cuttings from selected germplasm in hedge form near the mist

chamber for production of superior clonal planting stock. There are two possible approaches employed as (i) short-term through seeds with modest gain in productivity; and (ii) long – term through clones with greater genetic gain.

Vegetative reproduction (vegetative propagation, vegetative multiplication, vegetative cloning) is a form of asexual reproduction in plants and is a process by which new individuals grow without production of seeds or spores either naturally or by mechanical means. In India VMG's are set up for the species like *Eucalyptus*, *E. officinalis*, *G. arborea*, *T. indica*, bamboo etc.

The concept of Working Plans was introduced in the forestry sector of the country to manage the forests scientifically and systematically. These plans are prepared by Working Plan Divisions in the SFDs, at the Division level, generally for a period of 10 years after surveying, stock mapping, preparing inventories and mapping the existing status of each forest block in the division including blanks and have an important role for silviculture operations. The Plan gives prescriptions for the sustainable forest management of each area of forest including operations like aided natural regeneration, cultural operations, plantations, tree felling, etc. The *National Working Plan Code* is being implemented by MoEF&CC since 2014 which gives guidelines for preparing the Working Plans in a uniform format throughout the country.

WOOD BASED INDUSTRIES AND INTERNATIONAL TRADE

7.1. WOOD BASED INDUSTRIES

The Central Statistical Office of Ministry of Statistics and Programme Implementation (MoSPI), GoI is a nodal office for the country and is entrusted to set up the standards for collection, compilation and dissemination of statistical data in all spheres of the categories of importance. The standard for statistical purposes is termed as National Industrial Classification (NIC) and is based on the International Standards of Industrial Classification (ISIC). NIC guides to collect the data on different aspects of the economy to facilitate their use for *National Economic Policy* and is frequently used in classifying the economically active population, industrial production and distribution, labour statistics, national income etc. of the country. The current NIC-2008 has five digit codes for achieving the national needs and it provides a basis for the standardized collection, analysis and dissemination of industry (economic activity) wise economic data for India (NIC, 2008).

The NIC-2008 classified the activities into 21 Sections (A to U), 88 divisions, 238 groups, 403 classes and 1,304 subclasses. The Section A deals the agriculture, forestry and fisheries related activities under the title 'Agriculture, Forestry and Fishing'. The forestry is covered in Division 02 under 'Forestry and Logging' of the Section A. Important wood-based industries are covered under Division 16 and 17 of NIC 2008 and categorized wood-based industries in four broad categories namely; saw milling and plaining units (code 1610), panel (code 1621), solid wood (code 1622, 1623 and 1629) and pulp, paper and paperboard (code 1701, 1702 and 1709) industries.

Sawmills in India are classified under both organized and unorganized sectors. However, under Sections 2m(i) (employing around 8 to 10 people) and 2m(ii) (employing at least 20 people with no fixed limits on electricity consumed) under the Factory Act 1948, there are 1,374 registered sawmills in the country, which is minuscule compared with the actual number of sawmills currently under operation in the country (FSRI, 2019). Most of these sawmills are in the unorganized sector. Annual Survey of Industries (ASI) 2018 reports that there are a total of 2,353 panel industries, 952 solid wood industries and 7,180 pulp, paper and paperboard industries in the country.

7.2. INTERNATIONAL TRADE

The Directorate General of Commercial Intelligence and Statistics (DGCIS), Ministry of Commerce, GoI is responsible for collection, compilation and dissemination of India's Trade Statistics and Commercial Information. The export and import statistics and trade related information of the importers and exporters are useful for policy formulations to the Government and other users. The trade data is being compiled at 8-digit Indian Trade Classification (Harmonised System) (ITC (HS)) level covering around eleven thousand products. In this Chapter, various important wood products covered under group 44 of different classes of the ITC (HS) codes are considered as Wood in Rough, Sawn Wood, Veneers, Plywood, Particle Board and Fuel-wood. The definitions of these products according to FAO/ITTO are given below:

- Wood in Rough:** The first approximation to a measure of the forest harvest taken in a period. It covers all wood raw material taken from wood in the rough, including chips produced in the forest.
- Sawn Wood:** The products of the simple processes of sawing and peeling, with the associated processes of hewing, profile chipping and slicing.
- Veneer:** The thin sheet of wood, plies, sawed or rotary cut from a log or a hitch.
- Plywood:** A panel consisting of an assembly of veneer sheets bonded together with the direction of the grain in alternative plies generally at right angles.
- Particle Board:** It is a generic term for board material manufactured from wood particles or other lignocelluloses materials and a synthetic resin consolidated under heat and pressure.
- Bamboo:** Bamboo is considered as versatile natural resource which is extensively used in cottage industry for making various household products, besides house construction.
- Fuelwood:** Wood in the rough such as branches, twigs, logs, chips, sawdust and pellets used for energy generation.

Table 7.1. Detailed industrial structure for Forestry and Logging sector according to the NIC 2008

| Section | Agriculture, Forestry and Fishing |
|-------------------------|---|
| Division 02 | Forestry and Logging |
| Group 021 Class 2010 | Silviculture and other forestry activities Silviculture and other forestry activities <i>Exclusions:</i> Growing of Christmas trees; operation of tree nurseries; gathering of wild growing non-wood forest products and production of wood chips and articles |
| Sub-class 02101 | Growing of standing timber (planting, replanting, transplanting, thinning and conserving of forests and timber tracts) |
| Sub-class 02102 | Operation of forest tree nurseries |
| Sub-class 02109 | Other forestry activities including growing of pulpwood, firewood, etc. |
| Group 022 Class 0220 | Logging Logging <i>Exclusions:</i> Growing of Christmas trees; growing of standing timber; planting, replanting, transplanting, thinning and conserving of forests and timber tracts; gathering of wild growing non-wood forest products; production of wood chips and particles; production of charcoal through distillation of wood. |
| Sub-class 02201 | Gathering and preparation of firewood |
| Sub-class 02202 | Logging camps and loggers primarily engaged in felling timber and producing wood in the rough such as pitprops, split poles, pickets, hewn railway ties |
| Sub-class 02203 | Production of charcoal ion the forest (using traditional methods) |
| Sub-class 02209 | Other logging activities |
| Group 023 Class 0230 | Gathering of non-wood forest products Gathering of non-wood forest products <i>Exclusions:</i> Managed production of any of these products (except growing of cork trees); growing of mushrooms or truffles; growing of berries and nuts; gathering of firewood; production of wood chips |
| Sub-class 02301 | Gathering of tendu leaves |
| Sub-class 02302 | Gathering of lac, resins and rubber-like gums |
| Sub-class 02303 | Gathering of wild growing mushrooms, truffles, berries, nuts, cork, balsams, vegetable hair, eelgrass. Mosses, lichens |
| Sub-class 02309 | Gathering of non-wood forest products |
| Group 024 Class 0240 | Support services to forestry Support services to forestry <i>Exclusions:</i> operation of forest tree nurseries |
| Sub-class 02401 | Forestry service activities (forest management consulting services, forestry inventories, timber evaluation, forest pest control) |
| Sub-class 02402 | Logging service activities such as transport of logs within the forest |

**Table 7.2. Detailed industrial structure for wood based industry according to the NIC 2008**

| Division 16 | Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials |
|--------------------|---|
| Group 161 | Saw milling and planning of wood |
| Class 1610 | <p>Saw milling and planning of wood</p> <p><i>Exclusions:</i> Logging and production of wood; manufacture of veneer sheets thin enough for use in plywood, boards and panels; manufacture of shingles and shakes, beadings and mouldings.</p> |
| Sub-class 16101 | Sawing and planning of wood |
| Sub-class 16102 | Manufacture of unassembled wooden flooring including parquet flooring |
| Sub-class 16103 | Manufacture of wooden railway sleepers |
| Sub-class 16109 | Activities related to saw milling and planning of wood |
| Group 162 | Manufacture of products of wood, cork, straw and plaiting materials |
| Class 1621 | <p>Manufacture of veneer sheets; manufacture of plywood, laminboard, particle board and other panels and board</p> |
| Sub-class 16211 | Manufacture of ply wood and veneer sheets |
| Sub-class 16212 | Manufacture of particle board and fibre board |
| Sub-class 16213 | Manufacture of flush doors and other boards or panels |
| Sub-class 16219 | Manufacture of other plywood products |
| Class 1622 | <p>Manufacture of builders' carpentry and joinery</p> <p><i>Exclusions:</i> Manufacture of unassembled wooden flooring; manufacture of kitchen cabinets, bookcases, wardrobes, etc.; manufacture of wooden partition, free standing, etc.</p> |
| Sub-class 16221 | Manufacture of structural wooden goods |
| Class 1623 | <p>Manufacture of wooden containers</p> <p><i>Exclusions:</i> Manufacture of luggage; manufacture of cases of plaiting material</p> |
| Sub-class 16231 | Manufacture of wooden boxes, barrels, vats, tubs, packing cases, etc. |
| Sub-class 16232 | Manufacture of plywood chests |
| Sub-class 16233 | Manufacture of market basketry, grain storage bins and similar products of bamboo or reed |
| Class 1629 | <p>Manufacture of other products of wood; article of cork, straw and plaiting material</p> <p><i>Exclusions:</i> Manufacture of mats or matting of textile; luggage; wooden footwear, matches, clock cases, wooden spools and bobbins, furniture, wooden toys, brushes and brooms, etc.</p> |
| Sub-class 16291 | Manufacture of wooden industrial goods |
| Sub-class 16293 | Manufacture of wooden agricultural implements |
| Sub-class 16294 | Manufacture of articles of bamboo, cane and grass |
| Sub-class 16299 | Manufacture of other wood products |
| Division 17 | Manufacture of paper and paper products |
| Group 170 | Manufacture of paper and paper products |

| | |
|-----------------|--|
| Class 1701 | <p>Manufacture of pulp, paper and paperboard</p> <p><i>Exclusion:</i> Manufacture of corrugated paper and paperboard; manufacture of further-processed articles of paper, paperboard or pulp; manufacture of coated or impregnated paper, where the coating or impregnant is the main ingredient; manufacture of cork life preservers.</p> |
| Sub-class 17011 | Manufacture of pulp |
| Sub-class 17012 | Manufacture of newsprint |
| Sub-class 17013 | Manufacture of paper and paper rolls not further processed |
| Sub-class 17014 | Manufacture of packing paper |
| Sub-class 17015 | Manufacture of other special purpose paper (excluding computer stationary) |
| Sub-class 17016 | Manufacture of paper board, straw board |
| Sub-class 17017 | Manufacture of hard board including false board and chip board |
| Sub-class 17019 | Manufacture of other primary paper materials including composite paper and paper board n.e.c. |
| Class 1702 | <p>Manufacture of corrugated paper and paperboard and containers of paper and paperboard</p> <p><i>Exclusion:</i> Manufacture of envelopes; manufacture of moulded or pressed articles of paper pulp (e.g., boxes for packing eggs, moulded pulp paper plates)</p> |
| Sub-class 17021 | Manufacture of corrugated paper and paperboard |
| Sub-class 17022 | Manufacture of corrugated paper board containers |
| Sub-class 17023 | Manufacture of cardboard boxes |
| Sub-class 17024 | Manufacture of sacks and bags of paper |
| Sub-class 17029 | Manufacture of other containers of paper and paperboard n.e.c. |
| Class 1709 | <p>Manufacture of other articles of paper and paperboard</p> <p><i>Exclusion:</i> - manufacture of paper or paperboard in bulk; printing on paper products; manufacture of playing cards; manufacture of games and toys of paper or paperboard</p> |
| Sub-class 17091 | Manufacture of computer paper |
| Sub-class 17092 | Manufacture of paper cups, saucers, plates, hoops, cones and other similar products |
| Sub-class 17093 | Manufacture of printing, writing and photocopying paper ready for use |
| Sub-class 17094 | Manufacture of paper pulp articles other than containers (such as egg trays) |
| Sub-class 17095 | Manufacture of file cover/file boards, and similar articles. |
| Sub-class 17096 | Manufacture of wallpaper |
| Sub-class 17097 | Manufacture of carbon paper & stationary items |
| Sub-class 17099 | Manufacture of other paper products n.e.c. |

Table 7.4. Important wood-based products and their ITC (HS) code details

| Products | Class with detail | Subclass with detail |
|----------------|--|--|
| Wood in Rough | 4403: Wood in the rough, whether or not stripped of bark or sapwood, or roughly squared | 440310: treated with paint, stains, creosote or other preservatives 440320: Other, coniferous 440341: Other, of tropical wood specified in sub heading note 1 to this chapter: 440349: Other 440399: Other: Andaman Padauk, Bonsum, Khair, Lampati, Laurel, Pali- wood and Red Sanders and Rose wood |
| Sawn Wood | 4407: Wood sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded or end-jointed, of a thickness exceeding 6MM | 440710: Coniferous 440729: Other 440799: Other |
| Veneers | 4408: Sheets for veneering (including those obtained by slicing laminated wood), for plywood or for similar laminated wood and other wood, dawn lengthwise, sliced or peeled, whether or not planed, sanded, spliced or end jointed, of a thickness not exceeding 6MM. | 440810: Coniferous 440831: Of Dark Red Meranti, Light Red Meranti and Meranti Bakau 440839: Other 440890: Other |
| Plywood | 4412: Plywood, veneered panels and similar laminated wood | 441210: Of Bamboo 441231: Other plywood, consisting of sheets of wood (other than bamboo), each ply not exceeding 6mm thickness 441232: Other, with at least one outer ply of non-coniferous wood 441239: Other 441299: Other |
| Particle board | 4410: Particle board, oriented strand board(OSB) and similar board (for example wafer board) of wood or other ligneous materials, whether or not agglomerated with resin or other organic binding substances of | 441011: Particle board 441012: Oriented strand board (OSB) 441090: Other (including veneered particle board, not having decorative veneers on any face) |
| Wood Charcoal | 4402: Wood Charcoal (including shell or nut charcoal), whether or not agglomerated | 440210: Wood charcoal (including shell or nut charcoal), whether or not agglomerated 440290: Other |

| Products | Class with detail | Subclass with detail |
|--------------------------|---|---|
| Resins | 1301: Lac; Natural Gums, Resins, Gum-resins and Oleoresins (for example, balsams) | 13019021: Copal 13019022: Dammar batu 13019029: Other |
| Bamboos and its products | 1401: Vegetable materials of a kind & used primarily for plaiting (For example, bamboos, rattans, reeds, rush, osier, raffia, cleaned, bleached or dyed cereal straw and lime bark) | 14011000: Bamboos |
| | 2005: Other vegetables prepared or preserved otherwise than by vinegar or acetic acid, not frozen (excluding preserved by sugar, and tomatoes, mushrooms and truffles) | 20059100: Bamboo shoots |
| | 4402: Wood Charcoal (including shell or nut charcoal), whether or not agglomerated | 44021010: Of Bamboo |
| | 4409: Wood (including strips and friezes for parquet flooring, not assembled) continuously shaped (Tongued, Grooved, Rebated, Chamfered, V-Jointed, Beaded, Moulded, Rounded or the Like) Along any of its edges or faces, whether or not planed, sanded or end-jointed | 44092100: Of Bamboo |
| | 4412: Plywood, Veneered panels and similar laminated wood | 44121000: Of Bamboo |
| | 4601: Plaits and similar products of plaiting materials, whether or not assembled into strips; plaiting materials, plaits and similar products of plaiting materials, bound together in parallel strands or woven, in sheet form, whether or not being finished artic | 46012100: Of Bamboo 46019200: Of Bamboo |
| | 4602: Basketwork, wickerwork and other articles, made directly to shape from plaiting materials or made up from goods of heading 46.01; articles of loofah | 46019200: Of Bamboo 46021100: Of Bamboo |
| | 4823: other paper, paperboard, support of paper pulp, paper or paperboard (whether or not perforated or hardened) | 48236100: Of Bamboo |
| Fuel-wood | 4401: Fuel wood, in logs, in billets, in twigs, in faggots or in similar form; Sawdust and wood waste and scrap, whether or not agglomerated in logs, briquettes, pellets or similar forms. | 44011010: Others Fuel wood, in logs, in billets, in twigs, in faggots or in similar form; |
